

COURAGE EBOIGBE

SOFTWARE DEVELOPER

couragepaul.cp@gmail.com | 204-583-7396 | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Self-motivated Software Developer with over 7 years experience specializing in mobile application development frameworks and technologies across various projects, enhancing user experience, and driving successful project outcomes through effective cross-functional collaboration.

AREAS OF EXPERTISE

Languages	Java, C#, JavaScript, TypeScript, SQL, Kotlin, ReactNative, React
Technologies	TailWind CSS, Git, Android Studio, RESTful APIs, Webstorm, Figma, Android OS, Jetpack Compose, RESTful APIs, MySQL, Linux, XML

PROFESSIONAL EXPERIENCE

Android Developer, Nascent Digital | Toronto, ON **Nov 2021 - Present**

- Built custom animations and transitions using Android Animation APIs and MotionLayout for enhanced user experience.
- Collaborated with QA teams to identify, reproduce, and resolve bugs across different device configurations.
- Conducted code reviews using Git workflows, ensuring adherence to coding standards and best practices.
- Applied Firebase A/B testing feature to manage staggered releases across test/control groups.
- Developed reusable components and modules using Jetpack Compose.

App Developer, Nascent Digital | Toronto, ON

- Implemented atomic design methodology to design app components using TailWind CSS.
- Spearheaded a feature that significantly increases consumer time spent on the app.
- Maintained mobile applications using React Native and TypeScript, leveraging strong type definitions to enhance code reliability and maintainability.
- Integrated and managed data flow using GraphQL-based data models to define and structure data architecture.
- Utilized release toggles and remote configuration flags to manage feature rollout and testing.
- Increased user retention by 10% through implementation of tutorial and onboarding hub feature based on personalized user experiences.

Software Developer, Mui Scientific | Mississauga, ON **Nov 2017 - Oct 2021**

- Developed custom UI components and layouts using XML, ensuring responsive design across various screen sizes and densities.
- Architected and developed native Android applications using Java, following MVVM architectural pattern.
- Implemented complex RecyclerView adapters with ViewHolder patterns for efficient list rendering and memory management.
- Executed background processing using AsyncTask, ThreadPoolExecutor, and JobScheduler for long-running operations.
- Designed feature stories and software validation documents for new feature releases.

PROJECTS

EasyBot

github.com/couragepaul/easybot

Built a real-time messaging interface with persistent chat history and seamless user experience across app sessions.

Technologies used: Android Studio, Retrofit, Rxjava, Git, Firebase AI, Kotlin, Room.

- Integrated Firebase AI (Gemini) SDK for intelligent chatbot responses and natural language understanding.
- Implemented Room persistence library to ensure type-safe database operations and reliable message data retention across app sessions.
- Created custom composables for message bubbles, typing indicators, and timestamp formatting.

OldiesButGoodies

github.com/couragepaul/oldiesbutgoodies

Designed an android application featuring classic movie catalog with API integration and paginated data display for optimized performance.

Technologies used: Firebase, Glide, JSON, Jetpack Compose, Android Studio, Kotlin.

- Built component libraries following Material Design guidelines for buttons, cards, and navigation patterns.
- Enhanced user interface with lottie animations and glide image loading for improved UI design and styling.
- Optimized app performance through lazy loading implementation with placeholder states and error handling for images and data.

WeatherApp

github.com/couragepaul/whatstheweather

Developed weather forecast application with city-based search functionality and real-time weather data retrieval through external weather API integration.

Technologies used: Firebase, Coil, JSON, Jetpack Compose, Android Studio, RESTful API, Kotlin.

- Developed RESTful API integrations using Retrofit, OkHttp, and Gson for JSON parsing and network communication.
- Utilized Integrated Coil and Jetpack Compose navigation libraries in app for navigation and image url responses.
- Applied comprehensive Material Design 3 theming with dynamic colour schemes and typography scales.

EDUCATION & CERTIFICATION

University of Manitoba, Winnipeg, MB

- BSc. Computer Science with specialization in Software Engineering

Certification

- MTA Certification in Software Development
